

Bellvue®

The wall behind Towers 7-9 will be demolished, once the construction activity is over at Central Park II.

A Club showcasing the ultimate in fine living will soon be made available to the residents of Bellevue. Coming up opposite Towers 7-9, the Club will boast of features like – multi-utility rooms hosting a resto-bar, functions, reading, study, cards and billiards & pool table, etc. In addition to this, it will also have 2 fully furnished 5-star guest rooms and a large kitchen for the guests of Bellevue residents.

Bellevue residents have enjoyed the luxury of taking a break from the monotony by relaxing at the large pool and the kids' pool in the Bellevue complex. In addition to this, another large pool is coming up next to Towers 7-9.

Making the pool experience of the residents more convenient and enjoyable, the Changing Room of the existing pool is being shifted to ground level. Pathways for easy access to the pool are also being created.

The EWS Site is being relocated and will be shifted away from Bellevue. Also, just to ensure that our customers get to enjoy the same level of quality across all our projects, all Civil/ Electrical/ Technical/ Construction works are being revisited and rechecked.

Adding on to the world-class facilities and amenities that our customers are already enjoying, a state-of-the-art gym has been created and will soon be open for the residents.

Your home plays an important role in creating an impression about you. And more often than not, the impression starts right outside it. That's precisely why we have been striving hard to improve the entrance of Bellevue. This includes, involving the authorities for an improved Sohna Road, removing the overhead cables, discontinuing parking in front of Belfort, improving the entrance fountains and Reception Room amongst others all this, because we believe that the entrance pre-defines and promises a great Residency.
